

Student-Teacher Appointment Booking System By Shriya Naik

Objective

- Objective: This research proposes a web-based appointment booking system that allows students and teachers to be aware of their appointment time regardless of where they are by using the web or mobile devices.
- By connecting to the Internet, students and teachers can easily access the system. It also permits students to send any message, including the appointment's purpose and timing.

Benefits

Students-Teacher Appointment Booking Helps to

- i. Schedule an appointment.
- ii. Time management.
- iii. System provides a record of all appointment, makes easier to track and monitor interaction.
- iv. Reducing students-teachers wait times.
- v. Encourage students to actively seek help and engage with teacher.

Modules

- Administrator Module: Admin is responsible to add details of teacher Such as Name, Department and Subject. It can even update or delete details of the teachers.
- Admin can approve the student Registration.

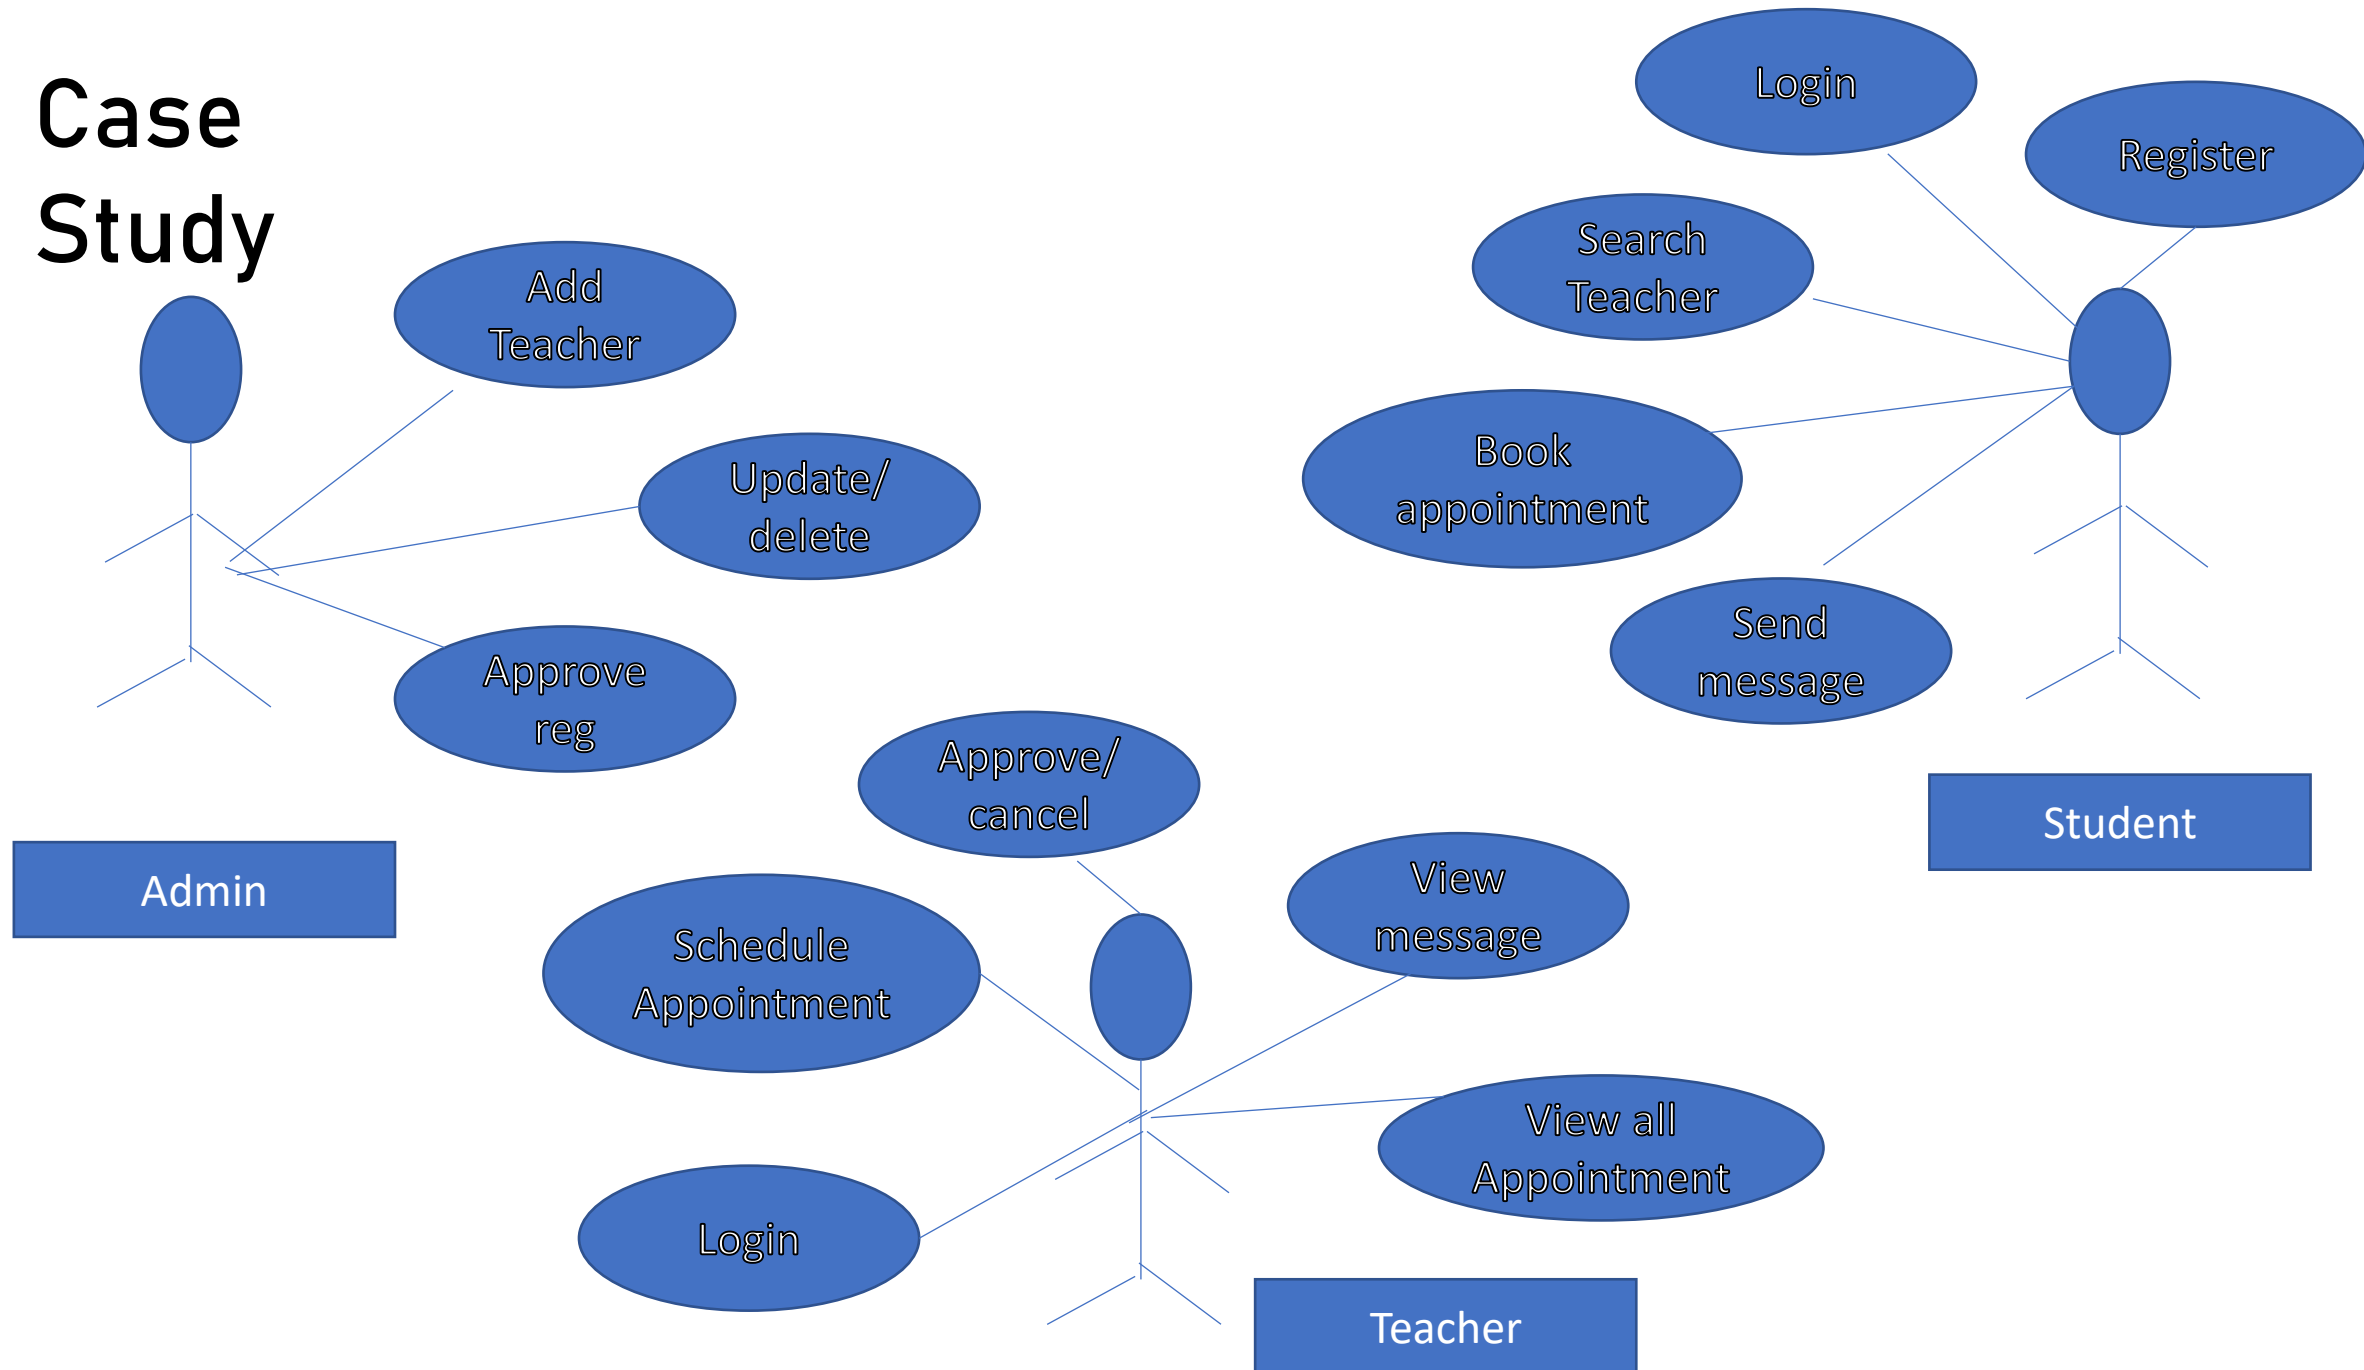

Student Modules: If Student is new to the website then he/she has to register first.

- Login and can search teacher, book appointment with respective subject teachers,
- And send feedback or message to that teacher through email.

Teacher module:

- Teacher can access the website by login.
- Teacher can schedule an appointment, Cancel or approve the appointment booked by students, View all the appointment lists and even view the feedback sent by students.

Conclusion

- The product is perfect to what is stated for proposed system. It has been checked thoroughly in different circumstances and found to be working perfectly. Using this the administration can easily maintain the details of teachers and approve student. The students will search teachers and Book the appointment, even can send message to that particular teacher. The teacher can view the appointment, schedule and even update the status.

THANK YOU
